STEP-BY-STEP GUIDE

How to Apply for a Job Referral

1 Find the Right Job

- Visit the company's official **Careers page**.
- Search for a role that matches your skills, experience, education and eligibility.
- Note down the **Job Title** and **Job ID**.

2 Check the Job Requirements

- Read the job description carefully.
- Make sure your skills and experience match the required criteria.

3 Find an HR or Employee for Referral

- Connect with a current employee or HR of the company (LinkedIn works best).
- Politely ask if they can refer you for that specific role.

4 Share Your Details

- Send a short mail with your **updated resume**, the **Job ID**, and your **relevant skills and experience**.

5 Employee or HR Submits the Referral

- They submit your profile through the company's internal referral system.

6 Wait for the Recruiter

- If your profile matches, the hiring team reviews it and contacts you for screening, assessment or interview rounds.

REMEMBER

No Job ID = Unclear Referral Request

Always send: Job ID + Updated Resume

This makes it easy for HR to identify the exact job you want to be referred for.
